

IDENTITY HEALTH CHECK

Unlock new possibilities and strengthen your identity security with ProofID's expert-led Identity Health Check. As experienced identity specialists, we bring unparalleled expertise to guide you through this transformative evaluation.

Our Identity Health Check is a comprehensive assessment of your organization's identity infrastructure. Our goal is to evaluate its health, performance, and security, identifying areas for improvement, potential risks, and optimization opportunities. Join us on this journey to enhance your identity capabilities and fortify your identity protection

► BUSINESS BENEFITS

Check performed
by certified
Identity experts

Detailed report
indicating gaps
and improvements

Certified IAM
consultants to
help strategize an
IAM roadmap

Enhance IAM
Efficiency with
performance
fine-tuning

Strengthen IAM
resilience by
minimizing identity-
related risks

Accelerated ROI
by optimizing
performance

► 5 STEP IAM HEALTH CHECK

1

PRE-ASSESSMENT CONSULTATION

A pre-assessment consultation is conducted to identify the organization's specific IAM requirements, objectives, and pain points.

2

DATA GATHERING

Data is gathered, including configuration settings, user access policies, authentication mechanisms, integration with other systems, system logs and performance metrics.

3

PERFORMANCE EVALUATION

Performance of the IAM implementation is evaluated in terms of response times, latency, scalability and more.

4

REPORT AND RECOMMENDATIONS

A detailed report is created outlining health check results, potential risks and recommendations for improvement.

5

POST-ASSESSMENT CONSULTATION

Post-assessment consultation is held to present the report findings with actionable recommendations.

+

IMPLEMENTATION SUPPORT & MONITORING (OPTIONAL)

Optional implementation support and follow-up monitoring are available.
